I have found that when a speck of gold is placed in a solution of chloride of gold the gold so placed will gradually grow into a small grain on a

It is not improbable that the gold in quartz was similarly deposited, so that in the literal sense it may perhaps be true (despite Aristotie's dog-matic statement to the contrary) that gold grows, although very slowly.

Calvin Snipes, the lynched man, and Aaron Wiseman were partners in an illicit distillery in Mitchell county and had told Wm.
